

# Manhattan 5 GLR

**July of 2006 will bring the latest advancement in the most successful line of Perennial Ryegrass germplasm in the world!!**

**MANHATTAN 5 GLR (PST-2AM)** promises to set the standard for another long run of high quality seed and top performance. Produced by the Manhattan Ryegrass Growers Association, this new cultivar will continue to build on the laurels created by the 40-year history of this program.

While bred to withstand attacks of Gray Leaf Spot, **Manhattan 5 GLR** also possesses salt tolerance, and resistance to not only stem rust, but also leaf spot. It's dark green color and fine texture will insure it continues to be prominent in overseeding programs and permanent turf programs across North America. It's excellent yield potential guarantees good availability at competitive prices.

2005 Mean Stem Rust Ratings		
Hubbard, Oregon		
9 = no disease		
	Fungicide Applied	No Fungicide Applied
PST-2AG4	8.0	6.8
