

## Summer's Number One Water-Saving Grass

**Aquaduct** Turf Type Tall Fescue has become one of the largest selling turf grass in the United States due to its drought tolerance.

**Aquaduct** takes drought tolerance to a new level and has been qualified by the Turfgrass Water Conservation Alliance (TWCA). Aquaduct also demonstrates superior wear tolerance and Summer ground cover, making it a prime choice for landscaping.

This new generation of Tall Fescue is dark green and forms a lush turf that will stay greener longer without supplemental irrigation.

Aquaduct is a TWCA qualified shade-tolerant grass seed ideal for sod production and landscaping.

Two recent NTEP trials demonstrated **Aquaduct** to be a top Tall Fescue performer under Traffic Stress conditions. And in another separate NTEP trial, **Aquaduct** was among the top performing Tall Fescues for “Percent Living Ground Cover In Summer,” grown in several different locations!

The qualification of **Aquaduct** by the Turfgrass Water Conservation Alliance (TWCA) represents a big benefit of this turfgrass. The protocols for TWCA qualification are highly demanding, requiring that water-starved grass maintain green covering through a series of drought simulations. Acceptance of this two-year protocol is only available after the organization has received two year's of independent third-party data verifying the turfgrass qualifies for testing.

**Aquaduct** is a continuation of **TMI's** commitment through our AquaWise program to continue to offer improved seed performance for our distribution partners, as well as leading the industry in environmentally responsible solutions.

#### KEY BENEFITS:

- Drought-Tolerant / Water Savings
- Traffic Stress Tolerance
- Summer Living Ground Cover
- Shade Tolerant

Call your **TMI** representative and discover why **Aquaduct** is your #1 choice for landscaping grass seed.

#### Industry Leaders

TMI develops, produces and markets turf grass seeds for the United States, North America and more than 20 other countries around the world.

Golf courses, sod growers for sod production and landscapers the world over have found TMI's cool season grasses, warm season grasses, golf grass, and specialty grasses to be state of the art when it comes to color, texture, uniformity, disease resistance and overall performance.

Our extensive network of carefully chosen seed growers produces seeds of the highest quality in the world, with high germination rates and purities that exceed official standards. Our certification, testing and quality controls continue to raise the benchmark for the entire Industry.
