

Bonsai2X

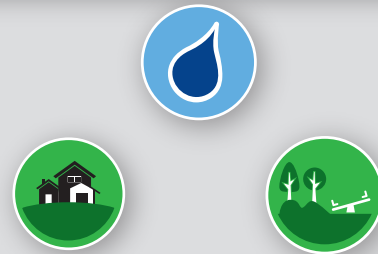

Next Generation Drought Tolerant Tall Fescue

Bonsai 2X has been bred for improved drought tolerance, adding to the disease resistance and high turf quality of Bonsai. Additional benefits of this Turf Type Tall Fescue for commercial and residential landscaping include:

- Compact growth habit
- Improved disease resistance
- Improved establishment rate

Bonsai 2X responds to the needs of water restriction regions, requiring watering only twice per week. Freedom from stem rust and leaf spot, along with high shoot density and aggressive tillering make this a high-value turfgrass.

Bonsai 2X is a TWCA qualified, shade-tolerant grass seed ideal for landscaping.
