

# Elektra GLR

## Disease Resistant Perennial Ryegrass

The ability of **Elektra GLR** to effectively transition from winter dormancy to active spring growth makes it an exceptional variety for states that have cold winter seasons, followed by warm spring seasons. From a transition region in the NTEP Perennial Ryegrass Test, Elektra was ranked #1 in the living ground cover category, coming in at 94.5% living ground cover in the spring.

Unique features of Elektra GLR include:

- High Resistance to Stem Rust and Pink Snow Mold
- Resistance to Grey Leaf Spot
- Dark Green Color
- High Divot Recovery Percentage

**Elektra GLR** provides a broad spectrum of uses for premium turf quality for lawns, sports fields, and golf courses.
