

## Superior Quality, Low Maintenance Hard Fescue

**Firefly** is an advanced generation of Hard Fescue germplasm. It is a dark green, leafy, persistent hard fescue with excellent cold and drought tolerance. As with most fine fescues, it is an excellent candidate for low maintenance turf where less fertilizer, mowing frequency and irrigation can be an issue. **Firefly** even rated tops for its "un-mowed" appearance as an ornamental grass!

**Firefly** is well suited for mixing with perennial ryegrasses and bluegrasses at it's recommended rate of 20-40% of the mix.

**Firefly** is a Blue Tag turfgrass well suited for seed mixes intended for low maintenance landscaping, including golf courses and parks.

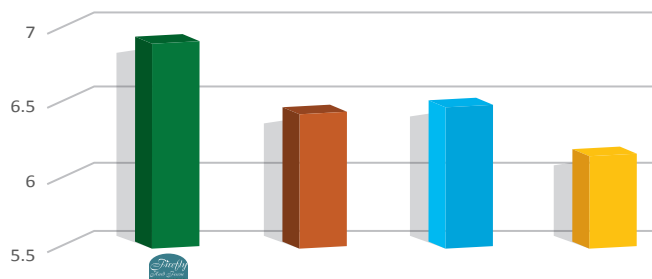

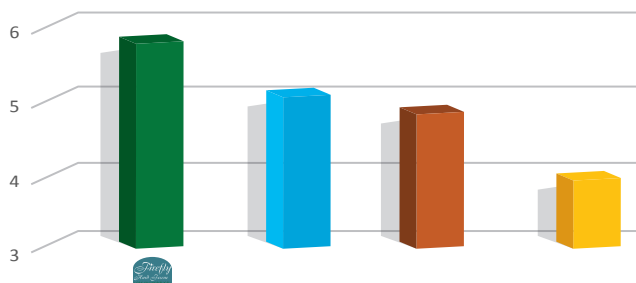

While **Firefly** was at the top of it's class for summer and spring green-up, it also makes an excellent shade grass which is resistant to red thread, dollar spot and leaf spot. Its winter color is unsurpassed!

NTEP trials demonstrated the exceptional quality of **Firefly**:

**Genetic Color Ratings  
Hard & Sheep Fescue Cultivars**

**Turfgrass Quality Ratings  
Hard & Sheep Fescue Cultivars**

#### KEY BENEFITS:

- Low Maintenance Requirements
- Low Input Requirements
- Turfgrass Quality
- Disease-Resistance

#### Industry Leaders

TMI develops, produces and markets turf grass seeds for the United States, North America and more than 20 other countries around the world.

Golf courses, sod growers for sod production and landscapers the world over have found TMI's cool season grasses, warm season grasses, golf grass, and specialty grasses to be state of the art when it comes to color, texture, uniformity, disease resistance and overall performance.

Our extensive network of carefully chosen seed growers produces seeds of the highest quality in the world, with high germination rates and purities that exceed official standards. Our certification, testing and quality controls continue to raise the benchmark for the entire Industry.
