

Nomad4

PERENNIAL RYEGRASS

Attractive, Dense & Durable Ryegrass

Nomad 4 Perennial Ryegrass is a creeping perennial ryegrass that forms a very attractive, dense, and durable turfgrass stand.

The prostrate growth habit of this variety increases its wear tolerance and shear/divot resistance over traditional perennial ryegrasses due to its decumbent growth habit and increased density, making it a superior choice for tee boxes and sports fields.

Call us about this fine-leaf, medium dark green seed that is an excellent choice for overseeding permanent turf or dormant Bermudagrass turfs in the southern U.S.

Nomad 4 is a Perennial Ryegrass seed ideal for sports turf blends or golf course mixtures or wherever high traffic dictates a more resilient turf.

Nomad4

P E R E N N I A L R Y E G R A S S

Quick to germinate and extremely hardy, **Nomad 4** is an exceptional choice for applications subject to high traffic.

In testing performed at North Carolina State University, **Nomad 4** demonstrated that it was “the most difficult (ryegrass) to shear/divot.” This means that for tee boxes and sports fields, overseeding with **Nomad 4** delivers more reliable performance in the most difficult conditions!

Nomad 4 adds resilience and color in overseeding, providing a live playing surface during the winter months, and ensures a smoother transition period into spring.

Seeding rate is the same as typical ryegrasses in the 5-8 pound/1000 sq. foot range.

For best results, mowing height is 1.5 inches, though **Nomad 4** may be mowed as low as .50 inches in cooler climates.

KEY BENEFITS:

- **High Shear/Divot Resistance**
- **Prostrate Growth Habit**
- **Adaptable To Varied Mowing Heights**
- **Medium Dark Green Color**

Industry Leaders

TMI develops, produces and markets turf grass seeds for the United States, North America and more than 20 other countries around the world.

Golf courses, sod growers for sod production and landscapers the world over have found TMI's cool season grasses, warm season grasses, golf grass, and specialty grasses to be state of the art when it comes to color, texture, uniformity, disease resistance and overall performance.

Our extensive network of carefully chosen seed growers produces seeds of the highest quality in the world, with high germination rates and purities that exceed official standards. Our certification, testing and quality controls continue to raise the benchmark for the entire Industry.
