

TURF TYPE PERENNIAL RYEGRASS

## Overseeding For The Southern U.S.

**Rodeo 3** Perennial ryegrass represents the culmination in ryegrass breeding that incorporates all the features any golf course superintendent, landscaper or sod grower would want in an overseeding ryegrass. We have enhanced the winter color, texture and ease of transition. And by improving the yielding capability, we've ensured **Rodeo 3** is economical for the end users.

Offering reduced vertical growth, excellent winter color and quick establishment, **Rodeo 3** provides the keys to a successful overseeding each year.

**Rodeo 3** is a Perennial Ryegrass seed ideal for overseeding dominant Bermuda of golf courses, sports fields and landscaping in the Southern U.S. and the western desert areas of Arizona, California and Nevada.
