

The Darkest Green For Winter Greens Overseeding

Poa Trivialis has become the clear choice of discerning turf managers for overseeding dormant bermudagrass greens and fairways. The market has been demanding darker green, more disease resistant Poa trivs than has been available in the past. TMI has spent years developing **StarDust 2** to be one of the darkest commercial Poa Trivialis cultivars for better color matches with some of today's darkest green ryegrasses such as **Evening Shade, Blackhawk, and Laredo.**

University overseeding trials in Florida and Arizona have shown **StarDust 2** is setting a higher standard!

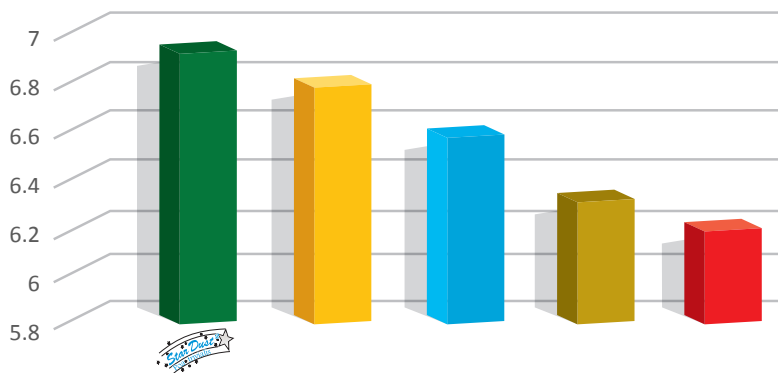

StarDust 2 is an ideal choice for golf course greens winter overseeding, particularly in the Southeast.

University tested for years at prestigious turf trials confirm that **StarDust 2 Poa Trivialis** demonstrates superior performance in establishment, quality, color and putting speed.

**Mean Turfgrass Uniformity
University Trial**

As an alternative to overseeding greens with perennial ryegrass, **StarDust 2** provides a much easier transition. And, unlike perennial ryegrass, it is not necessary to stop play while allowing **StarDust 2** to establish. Overseeding the greens with **StarDust 2** will allow superintendents to create a fine, dark green putting surface as the bermudagrass is becoming dormant without having to restrict play.

KEY BENEFITS:

- **Easy and smooth greens transitioning**
- **Extremely dark green color**
- **Superior establishment**

Industry Leaders

TMI develops, produces and markets turf grass seeds for the United States, North America and more than 20 other countries around the world.

Golf courses, sod growers for sod production and landscapers the world over have found TMI's cool season grasses, warm season grasses, golf grass, and specialty grasses to be state of the art when it comes to color, texture, uniformity, disease resistance and overall performance.

Our extensive network of carefully chosen seed growers produces seeds of the highest quality in the world, with high germination rates and purities that exceed official standards. Our certification, testing and quality controls continue to raise the benchmark for the entire Industry.
