

Turf Type Tall Fescue Blend

One Tall Fescue With The Benefits Of Three!

Individual Turf Type Tall Fescues have proven themselves to be top performers with extraordinary turf quality, heat and drought tolerance and a lush dark green color.

Now, three of the top rated Turf Type Tall Fescues (the advanced generation of synthetic cultivars) have been blended to achieve what no variety can accomplish individually.

Turf Gem II is the best of what Turf Type Tall Fescues have to offer for virtually any application!

Turf Gem II is a hybrid of the best of the Top 3 Turf Type Fescues, well suited for landscaping, sports fields, golf courses, highway medians and cemeteries.

Turf Type Tall Fescue Blend

Turf Gem II gives you the best of Turf Type Tall Fescues:

Heat and Drought Tolerant

Turf Gem II will withstand hot summer temperatures and required less water than most other types of grasses.

Disease Tolerant

Individual varieties in **Turf Gem II** has improved resistance to leaf spot, brown patch and other plant diseases and insects. Plus, because **Turf Gem II** is a blend, it has a wider tolerance to any disease than a single variety would.

Traffic Tolerant

Turf Gem II's high density turf performs well even under heavy traffic. It has 5-6 times more tillers than Kentucky 31 Fescue*.

Excellent Leaf Texture

Turf Gem II's narrow tapering leaves form a high density carpet-like turf with excellent dark green color.

Quick Germination and Seedling Development

Turf Gem II has been rated better than many commercially available varieties.

Shade Tolerant

Turf Gem II grows well in shade and has better shade tolerance than other cool season grasses.

Low Maintenance

Turf Gem II's ability to look good even on a low fertilizing program (2-4 lbs of N per 1000 sq. Ft. is suggested) plus all of the above benefits will lower your labor and supply costs.

Industry Leaders

TMI develops, produces and markets turf grass seeds for the United States, North America and more than 20 other countries around the world.

Golf courses, sod growers for sod production and landscapers the world over have found TMI's cool season grasses, warm season grasses, golf grass, and specialty grasses to be state of the art when it comes to color, texture, uniformity, disease resistance and overall performance.

Our extensive network of carefully chosen seed growers produces seeds of the highest quality in the world, with high germination rates and purities that exceed official standards. Our certification, testing and quality controls continue to raise the benchmark for the entire Industry.
