

Water-Saving & Hardy Kentucky Bluegrass

WaterWorks is a revolutionary development in Kentucky Bluegrass, resistant to both traffic stress and Dollar Spot disease, while also proving to be drought-tolerant, achieving the rigorous standards of TWCA – the Turfgrass Water Conservation Alliance.

With superior genetic color, **WaterWorks** is a superior choice for regions with watering restrictions.

Call us about **WaterWorks**, and help your customers win with a Bluegrass that works!

Waterworks is a TWCA qualified grass seed ideal for sports field, parks and recreation, and landscaping applications, as well as sod production.

In recent NTEP trials, **WaterWorks** demonstrated superior performance in Turfgrass Quality, Traffic Stress tolerance, Dollar Spot resistance, Genetic Color and Organic Maintenance. These results affirm this Kentucky Bluegrass to present value for a wide range of applications – making it a sure bet for your customers.

The qualification of **WaterWorks** by the Turfgrass Water Conservation Alliance (TWCA) represents a big benefit of this turfgrass. The protocols for TWCA qualification are highly demanding, requiring that water-starved grass maintain green covering through a series of drought simulations. Acceptance of this

two-year protocol is only available after the organization has received two year's of independent third-party data verifying the turfgrass qualifies for testing.

WaterWorks is a continuation of **TMI's** commitment to continue to offer improved seed performance for our distribution partners, as well as leading the industry in environmentally responsible solutions.

KEY BENEFITS:

- **Turfgrass Quality**
- **Drought-Resistance / Water Savings**
- **Genetic Color**
- **Traffic Wear Tolerance**
- **Dollar Spot Resistance**

Industry Leaders

TMI develops, produces and markets turf grass seeds for the United States, North America and more than 20 other countries around the world.

Golf courses, sod growers for sod production and landscapers the world over have found TMI's cool season grasses, warm season grasses, golf grass, and specialty grasses to be state of the art when it comes to color, texture, uniformity, disease resistance and overall performance.

Our extensive network of carefully chosen seed growers produces seeds of the highest quality in the world, with high germination rates and purities that exceed official standards. Our certification, testing and quality controls continue to raise the benchmark for the entire Industry.
