

## Drought-Tolerant | Low Maintenance Fine Texture | Deep Green Color

Celestial™ Strong Creeping Red Fescue is a next-generation synthetic fine fescue cultivar developed to meet the growing demand for sustainable, low-input turfgrass solutions. With its exceptional adaptability to both sun and partial shade, Celestial™ is a top performer in a wide range of landscape applications—from residential lawns to parks and golf courses.

This cultivar is distinguished by its fine leaf texture and deep, rich green color, which contribute to a refined and elegant turf appearance. Its creeping growth habit promotes excellent ground coverage and recovery, making it ideal for areas subject to wear or environmental stress.

For optimal performance, Celestial™ is highly recommended for use in seed mixtures with **Perennial Ryegrass** and **Kentucky Bluegrass**, comprising up to **40%** of the blend. This combination improves turf density, color uniformity, and seasonal adaptability.

Celestial™ also offers strong resistance to common turf diseases and performs well in poor soils, making it a reliable choice for challenging environments. Its low growth rate reduces mowing frequency, contributing to lower maintenance costs and environmental impact.

### Celestial™ is particularly well-suited for:

- Home lawns seeking a lush, low-maintenance turf with minimal irrigation and fertilization.
- Golf course fairways and roughs where visual quality and durability are essential.
- Public green spaces and parks that require resilient turf with reduced upkeep.
- Blended turfgrass mixtures, where Celestial™ enhances texture and color balance.
