

rhambler2^{SRP}

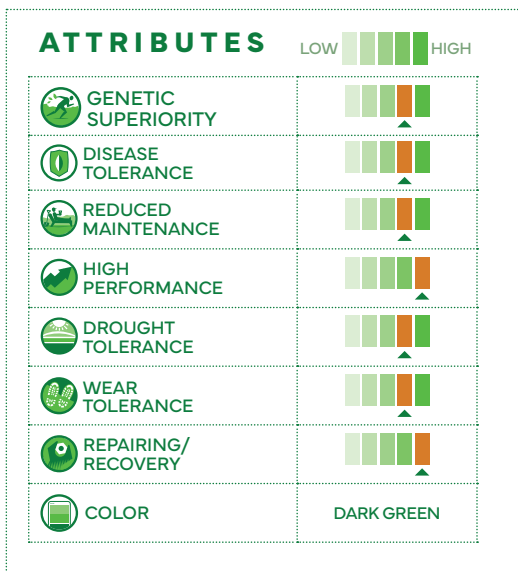

Wear Resistant, Self-Repairing Tall Fescue

Rhambler 2 SRP is a versatile tall fescue with a fine texture and dark green color, making it an excellent addition to Kentucky Bluegrass blends. It's a natural choice for a wide range of applications, including sports fields, parks, and residential and commercial landscaping, especially throughout the Midwest.

What sets Rhambler 2 SRP apart is its Self-Repairing Potential (SRP). Unlike many other fescues, it produces rhizomes, which are underground stems that allow the grass to repair itself from wear and tear. This feature leads to faster establishment, better traffic tolerance, and a quicker recovery from damage.

Key Benefits

- **Self-Repair:** The rhizomes help the turf recover from wear and divots.
- **Wear Resistance:** NTEP (National Turfgrass Evaluation Program) trials have consistently ranked Rhambler 2 SRP as a top performer in living ground cover ratings under traffic stress.
- **High Quality:** It has been recognized for its superior turfgrass quality in trials across seven different locations, demonstrating its wide adaptability.
- **Disease Resistance:** This cultivar naturally resists Brown Patch, a common disease that can devastate other tall fescue varieties.
- **Shade and Drought Tolerance:** Rhambler 2 SRP is an excellent choice for a variety of conditions, as it can thrive in both shade and drought.
