

# TifElite™

## CENTIPEDE GRASS

TifElite™ is an improved, certified centipedegrass (*Eremochloa ophiuroides*) developed by the University of Georgia Tifton Campus. It is bred for superior turf density, uniform texture, and enhanced visual appeal compared to common centipedegrass, while retaining the species' hallmark low-input maintenance requirements.

TifElite™ is available as sod or through certified seed programs, ensuring genetic purity, varietal consistency, and performance reliability.

### Residential & Consumer Landscaping

- Lawns for homeowners seeking low fertility, low mowing turf
- Ideal for coastal and southeastern climates
- Performs well in acidic, sandy soils

### Commercial Landscaping

- Office parks and corporate campuses
- Apartment complexes and HOA green spaces

### Municipal landscapes and government facilities

- Roadside & Infrastructure
- Highway rights-of-way
- Utility corridors
- Low-maintenance buffer zones

### Institutional & Recreational

- Schools and parks (non-athletic use)
- Cemeteries
- Passive recreation areas
